Fundamentals of Pipeline Corrosion & Cathodic Protection

Qualified Operator Series

Table of Contents

Table of Contents.....	2
Chapter 1 - History of the Natural Gas Industry.....	11
Introduction	11
First Gas Works in the United States	11
Large Diameter Pipeline – Beginning of an Era	13
Chapter 2 - Industry Segments.....	16
Upstream	16
United States Oil Production	19
Natural Gas Processing	21
Offshore Production	22
Midstream	24
Gathering Operations.....	24
Gas Transmission Operations	25
Downstream.....	29
Development and Growth of an Industry	29
Gas Distribution - Plastic Pipelines	30
Chapter 3 - Pipeline Safety – Regulatory, History, & Procedure Development	32
DOT 49 CFR PART 191 – Transportation of Natural Gas by Pipeline	32
Definitions (DOT CFR Part 191.3)	32
Incident Reports (DOT CFR Part 191.5,7, and 9).....	33
Incident Reporting Requirements	34
Annual Reports (DOT CFR Part 191.11 and 15)	34
Safety-Related Condition Reports (DOT CFR Part 191.23 and 25)	34
Safety-Related Condition Reporting Requirements	35
Company Reporting Requirements.....	36
Example of a Company Reporting Procedure	36
Abnormal Operations (49 CFR 192.605 c)	38
State Reporting Requirements.....	39
Regulatory Oversight - CFR 49 Part 192	39
Subpart I – Requirements for Corrosion Control.....	39
§192.452 How does this subpart apply to converted pipelines and regulated onshore gathering lines?.....	39
§192.453 General.....	40
§192.455 External corrosion control: Buried or submerged pipelines installed after July 31, 1971.....	40

§192.457 External corrosion control: Buried or submerged pipelines installed before August 1, 1971.....	41
§192.459 External corrosion control: Examination of buried pipeline when exposed.....	42
§192.461 External corrosion control: Protective coating.....	42
§192.463 External corrosion control: Cathodic protection.....	43
§192.465 External corrosion control: Monitoring.....	43
§192.467 External corrosion control: Electrical isolation.....	44
§192.469 External corrosion control: Test stations.....	44
§192.471 External corrosion control: Test leads.....	44
§192.473 External corrosion control: Interference currents.....	45
§192.475 Internal corrosion control: General.....	45
§192.476 Internal corrosion control: Design and construction of transmission line.....	45
§192.477 Internal corrosion control: Monitoring.....	46
§192.479 Atmospheric corrosion control: General.....	46
§192.481 Atmospheric corrosion control: Monitoring.....	47
§192.483 Remedial measures: General.....	47
§192.485 Remedial measures: Transmission lines.....	47
§192.487 Remedial measures: Distribution lines other than cast iron or ductile iron lines.....	48
§192.489 Remedial measures: Cast iron and ductile iron pipelines.....	48
§192.490 Direct assessment.....	49
§192.491 Corrosion control records.....	49
Continuing Surveillance (49 CFR 192.613) Subpart L.....	50
Incidents that Created Regulations.....	50
Gas Odorization - New London, Texas 1937.....	50
CFR 49 192 Regulations - Natchitoches, Louisiana.....	51
Operator Qualification – Olympic Pipeline: Bellingham, Washington.....	51
Chapter 4 - Maintenance Pigging.....	52
Pigging Equipment.....	52
Pipeline Service and Condition.....	52
Bends.....	53
Off-takes.....	53
Junctions.....	54
Valves.....	54
Mechanical Couplings.....	55
Pig Launchers and Receivers (Pig Traps).....	55
Non-Piggable Pipelines.....	56

Temporary pig traps.....	56
By-Pass Pigging Valves.....	57
Opening & Closing Launcher and Receiver Closures.....	58
Closure Features.....	58
Threaded Closures.....	58
Clamp Ring Closures.....	60
Operating Conditions.....	61
1) Pig Speed.....	61
2) Temperature.....	63
3) Pressure.....	63
Signalers, Locators, and Tracking Systems.....	63
Pig Signaling.....	63
Pig Tracking.....	63
Launching and Receiving a Pig Safely.....	64
Proper Notifications.....	64
Launching the Pig.....	64
Receiving the Pig.....	66
Pig Runs.....	67
Steel Pipelines.....	67
Plastic Pipelines.....	67
Records.....	68
Chapter 5 - Corrosion & Cathodic Protection Fundamentals.....	69
Causes of Corrosion.....	69
Types of Corrosion.....	71
Galvanic Series.....	72
Differences in Electrical Potentials of Metal.....	72
Methods to Prevent Corrosion.....	76
Break the circuit.....	76
Pipeline Coating.....	76
Coating Inspection - Holiday (keeping) Inspection.....	78
Surface Preparation.....	79
Preparation Methods.....	79
Abrasive Blasting.....	79
Mechanical Abrasion.....	80
Solvent Cleaning.....	81

Other Surface Preparation Methods	81
Material Selection	81
Primers and Secondary Coats	81
Coating Applications	82
Coating Measurements	83
Dry Coating Thickness Gauges	83
Wet Film Coating Thickness Gauges	83
Coating Methods	83
Cold-Applied Tape	84
Epoxy Compounds and Heat-Shrink Sleeves - Preparation	84
Fusion-Bonded Epoxy Powder - Coating Application	84
Fusion-Bonded Epoxy - Repairs	85
Two-Part Epoxy Compound - Coating Application	85
Hot Enamel - Surface Preparation	85
Hot Enamel - Priming	85
Hot Enamel - Coating Application	85
Coal Tar Epoxy - Surface Preparation	86
Coal Tar Epoxy - Coating Application	86
Concrete-Coated Pipe - Surface Preparation	86
Concrete-Coated Pipe - Coating Application	87
Cathodic Protection	87
Effect of Disbonded Pipe Coating	88
Internal Corrosion	88
Corrosion Detection Methods	89
Monitoring Internal Corrosion	90
Chapter 6 - Electrical - Ohm's Law and Testing Instruments	91
Ohm's Law	91
Example of Ohm's Law in Action	92
Multimeter	93
Voltmeter	94
Voltage Sign	94
Voltage Range	94
Structure-to-Electrode Potential	96
Current Instruments	97
Ammeter	97

Current Flow Sign	98
Current Range	98
Current Shunt	99
Amp-Clamp	100
Resistance Instruments - Ohmmeter	100
Resistivity Meter	101
Chapter 7 - Rectifier Inspection - Impressed Current System.....	102
Personnel Safety	102
Impressed Current Systems	102
Connecting the Rectifier to Anodes of the Pipeline being Protected	104
Converting and Adjusting AC Power	105
Rectifier Components	106
Bi-Monthly Inspection	107
Annual Rectifier Inspection	108
Chapter 8 - Structure to Electrolyte Surveys	111
Test Station Survey - Structure to Electrolyte Potentials	111
Structure-to-Electrolyte Potential Measurements	112
Close Interval Surveys	114
Measuring Potential	115
Chapter 9 - Internal Corrosion	116
Corrosion Detection Methods	116
Pipe Inspection	116
Inspection Methods	117
Documentation	117
Types of Corrosion	117
CO ₂ Corrosion	117
H ₂ S Corrosion	117
Microbiologically Influenced Corrosion (MIC)	118
Anaerobic Bacteria	118
Aerobic Bacteria	118
The Role of Solids	118
Black Powder	119
Sample Collection Procedures	119
Sample Containers	120
Sample Collection	120

Sample Collection Without a Sample Port.....	120
Oxygen Influence.....	120
Water Sample Analysis.....	121
Water Sample Quantities.....	121
Storage and Preservation.....	122
Solid Samples.....	122
Dry Sample Containers.....	122
Labeling.....	123
Bacteria Testing Procedure.....	123
Solid Samples.....	123
Samples of Surface Scale or Biofilm.....	123
Liquid Samples.....	123
Inoculation of Media.....	123
Incubation.....	124
Bacteria Levels.....	124
H ₂ S Presence.....	125
Gas Quality Assurance.....	125
Other Specifications.....	126
Monitoring Internal Corrosion.....	126
Monitoring and Control Devices.....	126
Additional corrosion detection devices include:.....	126
Coupons and Probes.....	127
Coupon Handling and Storage.....	127
Records of Coupons.....	127
Coupon Insertion with a Retractable Holder.....	127
Removal of Coupons with a Retractable Holder.....	128
Safe Practices.....	128
Corrosion Rates.....	129
Transporting Corrosive Materials.....	129
Corrosion Inhibitors.....	130
Internal Corrosion Mitigation Review.....	130
Chapter 10 – Atmospheric Corrosion.....	131
Introduction.....	131
The Corrosion Cell.....	131
Aboveground Coatings.....	131

Atmospheric Corrosion	131
Pitting	132
Rating for Pitting	132
Causes of Atmospheric Corrosion	132
Prevention of Atmospheric Corrosion	133
Determining Atmospheric Corrosion	134
Special Precautions	134
Painting Exposed Piping	135
Precautions:	135
Paint Systems and Color Codes	135
Surface Preparation Methods	136
Abrasive Blasting	136
NACE Classifications	137
Mechanical Abrasion	137
Solvent Cleaning	137
Other Surface Preparation Methods	137
Material Selection	138
Primers and Secondary Coats	138
Topcoat	138
Coating Materials	138
Appendix – 49 CFR 195, Subpart H – Corrosion Control	139
Subpart H - Corrosion Control.....	139
195.551 What do the regulations in this subpart cover?	139
195.553 What special definitions apply to this subpart?	139
§195.555 What are the qualifications for supervisors?	140
§195.559 What coating material may I use for external corrosion control?	140
§195.561 When must I inspect pipe coating used for external corrosion control?	141
§195.563 Which pipelines must have cathodic protection?	141
§195.565 How do I install cathodic protection on breakout tanks?	141
§195.567 Which pipelines must have test leads and what must I do to install and maintain the leads?	142
§195.569 Do I have to examine exposed portions of buried pipelines?	142
§195.571 What criteria must I use to determine the adequacy of cathodic protection?	143
§195.573 What must I do to monitor external corrosion control?	143
§195.575 Which facilities must I electrically isolate and what inspections, tests, and safeguards are required?	144

§195.577	What must I do to alleviate interference currents?.....	145
§195.579	What must I do to mitigate internal corrosion?.....	145
§195.581	Which pipelines must I protect against atmospheric corrosion and what coating material may I use?	146
§195.583	What must I do to monitor atmospheric corrosion control?.....	146
§195.585	What must I do to correct corroded pipe?.....	147
§195.587	What methods are available to determine the strength of corroded pipe?	147
§195.588	What standards apply to direct assessment?	147
§195.589	What corrosion control information do I have to maintain?.....	151
§195.591	In-Line inspection of pipelines.....	152
Appendix A to Part 195—Delineation Between Federal and State Jurisdiction—Statement of Agency Policy and Interpretation.....		152
Appendix B to Part 195—Risk-Based Alternative to Pressure Testing Older Hazardous Liquid and Carbon Dioxide Pipelines		155
	Risk-Based Alternative.....	155
Appendix C to Part 195—Guidance for Implementation of an Integrity Management Program.		160
