Port Facilities Safety

Library	Course Code	Course Name	Description and Length (in minutes) 3-18-24	
Port Facilities Safety				
Port Facility Security	749SEC	Port Facility Security Awareness	Port Facility Security Awareness addresses the need for port facility security and the basic security requirements mandated by the MTSA. The course explains the intent of the MTSA, outlines a port's Facility Security Plan, and discusses potential security problems, certain dangerous cargo, and the importance of hazardous materials recognition.	40 minutes
Port Facility Security	750INT	International Maritime Security Regulations	International Maritime Security Regulations examines the IMO role in maritime security, the applicable elements of SOLAS 74, the ports and ships that come under the ISPS Code, and the USCG role in implementing the ISPS Code.	25 minutes
Port Facility Security	751THREAT	Threats to Maritime Security	Threats to Maritime Security explains the importance of recognizing threats from piracy, armed robbery, and terrorism, the effects of these threats, and ways to prevent or minimize these threats.	40 minutes
Port Facility Security	752INTER	Intermodal Operations	Intermodal Operations define key shipping terms, risks associated with intermodal shipping, maritime transportation logistics, and documentation required for transporting and transferring cargo.	55 minutes
Port Facility Security	753MTSA	Maritime Transportation Security Act (MTSA)	Maritime Transportation Security Act (MTSA) analyzes the basic goals, provisions, and importance of the Maritime Transportation Security Act, including security measures for the identification of people and vessels; provisions for security incident response; MARSEC levels, directives, and security breaches; and enforcement provisions.	55 minutes

Port Facility Security	754MTSAF	MTSA for Facilities	MTSA for Facilities explains the general requirements of the Maritime Security Transportation Act for facilities, the responsibilities and qualifications of entities involved in maintaining a compliant facility security program, and security assessments and plans used to organize facility security.	20 minutes
Port Facility Security	755MTSA	MTSA for Certain Dangerous Cargo	MTSA for Certain Dangerous Cargo (CDC) examines dangerous cargo port facilities and vessels, recognizes a CDC facility or vessel, CDC-required special security measures, and examines how CDC regulations are interrelated.	20 minutes
Port Facility Security	756MTSAV	MTSA for Vessels	MTSA for Vessels delves into Maritime Transportation Security Act (MTSA) regulations relating to vessels; responsibilities of the Company Security Officer, Vessel Security Officer, the Master, and the operator/owner; and basic vessel security measures.	20 minutes
Port Facility Security	757GOVMT	Government and Law Enforcement in Maritime Security	Government and Law Enforcement in Maritime Security addresses major maritime security initiatives at the federal level and lists government and law enforcement agencies involved in facility security.	25 minutes
Port Facility Security	758SPI	Ship/Port Interface Security	Ship/Port Interface Security explains when to use a Declaration of Security (DoS), what is included in its contents, who can complete one; and the reporting requirements of vessels before entering port, including MARSEC level compliance, Notice of Arrival, and Notice of Departure.	15 minutes
Port Facility Security	759MARSEC	Maritime Security Levels (MARSEC)	Maritime Security Levels (MARSEC) define MARSEC levels, compare MARSEC and DHS security levels, and describe what actions are required when the MARSEC level changes.	10 minutes
Port Facility Security	760FSACT	Port Facility Security Actions	Port Facility Security Actions illustrates the identity and meaning of each MARSEC level, actions required by port facilities, security procedures, and additional security actions for certain types of facilities.	40 minutes
Port Facility Security	761FSA	Facility Security Assessments	Facility Security Assessments examine the importance of a Facility Security Assessment (FSA) when creating a Facility Security Plan, the background information needed, conducting on-scene surveys, analysis and recommendation steps required, and the FSA report.	45 minutes

Port Facility Security	762RAM	Risk Assessment Methodology	Risk Assessment Methodology explains the key terms used in risk analysis, the steps taken in the risk assessment process, how to conduct each step, the software and checklists for security risk assessments, and best practices.	50 minutes
Port Facility Security	763SECEQ	Security Equipment	Security Equipment discusses the perimeters of a physical security system and the purpose of each; components of a security system for each perimeter; types, advantages, and limitations of security equipment; and the most important areas of a facility to protect.	90 minutes
Port Facility Security	764EQMAIN	Equipment Maintenance, Testing, and Calibration	Equipment Maintenance, Testing, and Calibration addresses preventive maintenance of security equipment and the implementation and use of records in a preventive maintenance program.	55 minutes
Port Facility Security	765FSPD	Port Facility Security Plan Development and Approval	Port Facility Security Plan Development and Approval covers the required content of an FSP and explains how it should be handled, the FSP approval process, and possible temporary security measures that may apply to an FSP.	40 minutes
Port Facility Security	766FSPI	Port Facility Security Plan Implementation and Maintenance	FSP Implementation and Maintenance explains the planning and implementation of a Facility Security Plan, methods to ensure that the plan remains effective over time, and communication and approval processes for implementing changes to the plan.	40 minutes
Port Facility Security	769EPROC	Emergency Procedures	Emergency Procedures address the elements of an emergency plan; how to minimize interruption of operations during and after an emergency; actions to take as the result of a bomb threat or releases of chemical, biological, or radioactive agents; and threats to facilities from vessel-related emergencies.	55 minutes
Port Facility Security	770EMER	Emergency Preparedness - Drills and Exercises	Emergency Preparedness Drills and Exercises addresses the purpose and requirements for drills and exercises, elements and differences; and post-drill/exercise performance assessment and debriefing.	70 minutes
Port Facility Security	771REC	Recordkeeping and Document Management	Recordkeeping and Document Management explores types of documents that must be available to the U.S. Coast Guard, as well as the validity and verification requirements for the Statement of Compliance, recordkeeping, and handling of Sensitive Security Information.	35 minutes

Port Facility Security	772TRAINR	Training Requirements	Training Requirements explains specific training standards mandated by the MTSA for facilities and provides methods for completion.	15 minutes
Port Facility Security	773TRAINT	Training Techniques	Training Techniques discusses how adults learn, workforce demographics, trainees with special needs, training development and techniques, evaluating training delivery options, and training session preparation.	45 minutes
Port Facility Security	774DET	Weapons and Dangerous Substances	Weapons and Dangerous Substances provide facility security personnel with information about weapons, dangerous substances, and methods for detecting them.	80 minutes
Port Facility Security	775PHYS	Physical Searches and Screening Methods	Physical Searches and Screening Methods examines persons authorized to search and when one should be done. Non-intrusive searches and special considerations when conducting a physical search is also addressed.	85 minutes
Port Facility Security	776SEARCH	Site Search Methods	Site Search Methods examine planning a site search, searching using search sectors and check cards, recognizing when to initiate a search, conducting interior and exterior searches, recognizing hiding places, and handling evidence.	60 minutes
Port Facility Security	777RECOG	Recognizing Persons Posing Risks	Recognizing Persons Posing Risks addresses security risk observation techniques, general characteristics and behavioral patterns of persons who are likely to threaten security, and appropriate ways to respond to a person who may pose a security risk.	45 minutes
Port Facility Security	778CIRC	Circumventing Security Measures	Circumventing Security Measures explores methods used by criminals and terrorists to circumvent security measures, signs of terrorist activities, and techniques to thwart terrorist activities.	50 minutes
Port Facility Security	779CROWD	Crowd Management	Crowd Management explores basic crowd psychology, crowd management during a crisis, physical management of a crowd; event planning, and effective crowd control.	70 minutes
Port Facility Security	780HAZARD	Hazardous Materials	Hazardous Materials addresses regulations that impact facilities; definition, detection, and identification of hazardous materials; risks involving hazardous materials cargoes and vessels carrying hazardous materials; and hazardous material incident response at ports.	45 minutes

Port Facility Security	781DRUG	Drug Awareness for Maritime Employees	Drug Awareness for Maritime Employees discusses symptoms and consequences of drug or alcohol abuse, effects, and workplace issues associated with drug abuse, the purpose of a drug- and alcohol-free workplace policy, resources for seeking help, and a self-test for substance abuse problems.	50 minutes
Port Facility Security	782DRUG	Drug and Alcohol Awareness for Supervisors	Drug and Alcohol Awareness for Supervisors addresses the benefits of a drug-free workplace and program, the role of a supervisor, recognizing substance abuse-associated regulations and job factors, confronting employees, and helping resources for employees.	50 minutes
