First Responder Training

Library	Course Code	Course Name	Description and Length (in minutes)	
First Responder Training	401EMS1	Introduction to EMS Systems: Part 1	Introduction to EMS Systems: Part 1 teaches first responders and others about the Emergency Medical Service system, including its components, levels of emergency personnel, and training. The in-hospital care system is also discussed. (1.0 CE)	50 minutes
First Responder Training	402EMS2	Introduction to EMS Systems: Part 2	Introduction to EMS Systems: Part 2 tackles the methods used to ensure the quality of patient care, including certification, medical oversight, and continuous quality improvement. (1.0 CE)	50 minutes
First Responder Training	403WELL	Well-Being of the First Responder	Well-Being of the First Responder examines stress that first responders may experience, reactions to death, and emergency response hazards. (1.0 CE)	50 minutes
First Responder Training	404LEGAL	Legal and Ethical Issues	Legal and Ethical Issues focus on the ethical responsibilities of a first responder, including scope of practice, standard of care, patient confidentiality, and other similar topics. (1.0 CE)	50 minutes
First Responder Training	405BODY	The Human Body	The Human Body is designed to provide first responders with an overview of the human body, including the muscular, skeletal, circulatory, respiratory, nervous, and other systems. (1.0 CE)	60 minutes
First Responder Training	406LIFT	Lifting and Moving Patients	Lifting and Moving Patients examines techniques for lifting and moving patients and preventing injuries by utilizing proper body mechanics. (1.0 CE)	50 minutes

First Responder Training	407BSI	Body Substance Isolation	Body Substance Isolation discusses methods to prevent exposure to infectious diseases. (1.0 CE)	50 minutes
First Responder Training	408INTCOM	Interpersonal Communications	Interpersonal Communications addresses reacting to and helping victims cope with traumatic events, discussing sensitive topics, and discussing death and dying appropriately. (1.0 CE)	55 minutes
First Responder Training	409AIR1	Airway: Part 1	Airway Part 1 explains the respiratory system, protective equipment for first responders, techniques for opening airways, signs of respiratory distress, foreign bodies, and airway devices. (1.0 CE)	60 minutes
First Responder Training	410AIR2	Airway: Part 2	Airway Part 2 explains the difference between ventilation and oxygen therapy when to implement rescue breathing for unconscious patients, methods of rescue breathing, and helping victims with special circumstances. (1.0 CE)	50 minutes
First Responder Training	411PA1	Patient Assessment: Part 1	Patient Assessment: Part 1 explains the process of patient assessment, on-scene hazards and precautions, determining the nature of injuries or illness, assessment priorities, and stabilizing the patient. (1.0 CE)	50 minutes
First Responder Training	412PA2	Patient Assessment: Part 2	Patient Assessment: Part 2 explains why it is important to get a detailed patient assessment, the normal ranges of each baseline vital sign, and outlines the steps in a detailed physical exam. (1 CE)	70 minutes
First Responder Training	413PA3	Patient Assessment: Part 3	Patient Assessment: Part 3 reviews the steps of a patient assessment and outlines the communication and documentation measures required for patient transfer of care. (1.0 CE)	70 minutes
First Responder Training	414CIRC	Circulation	Circulation teaches first responders about the components of the human circulatory system, taking a close look at the heart, blood, and blood vessels. Heart health is also discussed, including the impacts of cardiac arrest, high blood pressure, and shock on the human body. (1.0 CE)	50 minutes
First Responder Training	415CPR	Cardiopulmonary Resuscitation (CPR)	Cardiopulmonary Resuscitation (CPR) explains the cardiac chain of survival, how to give CPR to infants, children, and adults, and how to use an AED. The information is based on the American Heart Association Guidelines. It should be taken with, or in review of, an	65 minutes

			instructor-led, hands-on course. (1 CE)	
First Responder Training	416EMER1	Medical Emergencies: Part 1	Medical Emergencies Part 1 explains recognition, immediate intervention for life-threatening conditions, and care techniques for cardiac, respiratory, poisoning, allergic reaction, and exposure treatment. (1.0 CE)	50 minutes
First Responder Training	417EMER2	Medical Emergencies: Part 2	Medical Emergencies: Part 2 outlines quick and appropriate prehospital care for the signs and symptoms of specific problems related to shock, respiratory and cardiac failure, altered mental status, poisoning, and environmental illnesses. (1.0 CE)	60 minutes
First Responder Training	418BEHV	Behavioral Emergencies	Behavioral Medical Emergencies explores behavioral emergencies' inherent dangers and causes and how to provide emergency medical care. (1.0 CE)	55 minutes
First Responder Training	419BLEED	Bleeding and Soft Tissue Injuries	Bleeding and Soft Tissue Injuries examines control of external bleeding, care of patients experiencing internal bleeding and shock, and types and care of open soft tissue injuries. (1.0 CE)	60 minutes
First Responder Training	420BURN	Burn Treatment	Burn Treatment examines burn evaluation, self-protection when treating a burn patient, common burn agents, burn classification by severity, burn complications, smoke inhalation, burns of the eyes, and thermal, electrical, and chemical burns. (1.0 CE)	50 minutes
First Responder Training	421BAND	Bandaging and Splinting	Bandaging and Splinting describe the proper methods for applying each type of dressing or bandage and when to apply them. (1.0 CE)	50 minutes
First Responder Training	422BONE	Injuries to Muscles and Bones	Injuries to Muscles and Bones explains the musculoskeletal system, mechanism of injuries, common injuries, signs and symptoms of major injuries, extremity injuries, and medical care. (1.0 CE)	50 minutes
First Responder Training	423HEAD	Head and Spine Injuries	Head and Spine Injuries address assessing head and spinal injuries in responsive and unresponsive patients and basic immobilization techniques. (1.0 CE)	65 minutes
First Responder Training	424BIRTH	Emergency Childbirth	Emergency Childbirth discusses how the first responder should prepare and assist the mother in delivery and provide appropriate after-birth care for the mother and baby. (1.0 CE)	65 minutes

First Responder Training	425PPA	Pediatric Patient Assessment	Pediatric Patient Assessment outlines several assessment techniques appropriate for children, infants, and those with special needs. (1.0 CE)	50 minutes
First Responder Training	426TREAT	Treatment Consent Issues	Treatment Consent Issues explain how to obtain consent for providing medical care and address refusal of care or transport. (1.0 CE)	50 minutes
First Responder Training	427CDLAB	Clandestine Drug Labs	Clandestine Drug Labs addresses places where meth labs are likely to be hidden, hazards unique to clandestine labs, and how to safely secure a lab site as part of a first response investigation. (1.0 CE)	50 minutes
First Responder Training	428DOMV	Domestic Violence	Domestic Violence examines the root causes and types of domestic violence, steps for law enforcement and EMT responses to domestic violence; and roles of other first responders in domestic violence cases. (1.0 CE)	50 minutes
First Responder Training	429FAID	Basic First Aid	Basic First Aid is based on ECC Guidelines, and it is ideal as a study guide or refresher training for people who will soon be or are already certified in basic first aid. (1.0 CE)	55 minutes
First Responder Training	430TERR	Responding to Terrorism	Responding to Terrorism discusses different agents a terrorist might use, the different agencies involved in emergency response, including their respective roles, and the methods a responder can use to protect themselves and others from possible terrorist event hazards. (1.0 CE)	75 minutes
First Responder Training	431OPER	EMS Operations	EMS Operations include the phases of an out-of-hospital call, ambulance and equipment preparation, the role of emergency medical dispatch, and on-scene protocol for emergency vehicles. (1.0 CE)	50 minutes
First Responder Training	432FOE	Fundamentals of Extrication	Fundamentals of Extrication examines the extrication process, the use of common rescue tools, immobilizing entrapped patients, and rapid extrication. (1.0 CE)	60 minutes
First Responder Training	433HAZMAT	Hazardous Materials	Hazardous Materials explains what to do when hazardous materials are present at a scene and examines OSHA and NFPA requirements for EMS providers and first responders. (1.0 CE)	55 minutes
First Responder Training	434MULTI	Multiple Casualty Incidents	Multiple Casualty Incidents explores the criteria for and types of multiple casualty incidents. It also covers the Incident Command System and triage at the scene.	50 minutes

			(1.0 CE)	
First Responder Training	435PME	Pediatric Medical Emergencies	Pediatric Medical Emergencies summarize common injuries, illnesses, and physiological concerns common to emergencies involving young children and babies. (1.0 CE)	50 minutes
First Responder Training	436CHEM	Chemistry for First Responders	Chemistry for First Responders guides the first responder through the fundamental concepts of chemistry and addresses safety and environmental compliance. (1.0 CE)	75 minutes
